

Empowering Marketers to Build Apps Fast With No Code Required

Our platform is designed for the marketers who constantly push the envelope and believe marketing is never really done. The ones who are uber focused on the customer experience and have a million ideas of how to improve it. These marketers fall in love with our platform after building their first app and see unlimited potential.

Lumavate Is for Marketers Who Are...

Innovators

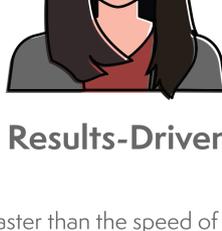

Customer-Obsessed

Fast-Paced

Change Agents

Results-Driven

We're for the marketers who need to move faster than the speed of the business to stay ahead of the competition. We're for the ones who make sure marketing actually gets done because we believe **REAL marketers hit publish.**

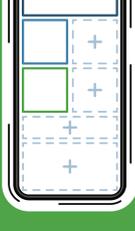

Get Started Fast

The world moves fast and so should your business. That's why we make it easy for you to build and publish new apps in only a few hours.

Lumavate Library

Extensive collection of widgets, microservices, and components to use to build your apps

Starter Kits

Templates for common app use cases that you can quickly rebrand

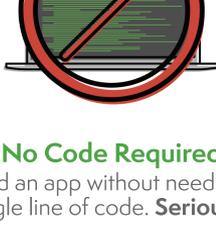

WYSIWYG

Instantly visualize what your app will look like with our What You See Is What You Get (WYSIWYG) interface

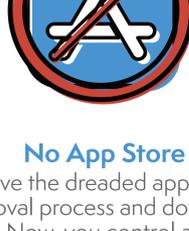

Put the Power in YOUR Hands

Take control of your app strategy back and determine what you publish, where it's accessed, and how often you update it. We're removing the middleman and putting the power back in your hands.

No Code Required

Build an app without needing a single line of code. **Seriously.**

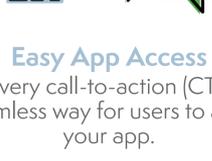

No App Store

Leave the dreaded app store approval process and download behind. Now, you control all aspects

Real-time Updates

Publish updates to your app and have them immediately available to users.

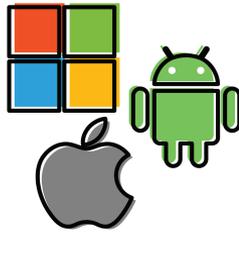

Easy App Access

Turn every call-to-action (CTA) into a seamless way for users to access your app.

One App, All Devices

Say goodbye to building a separate app for iOS, Android, and the web. We make it possible for you to build one app that works on all devices.

All Operating Systems

iOS, Android, or web. One app works across all of them.

All Form Factors

Mobile, tablet, or desktop. One app works on every device.

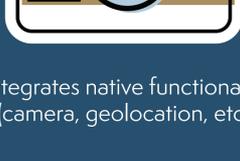

Device Preview

Easily preview your app across a variety of devices.

Delivered as PWAs

Welcome to the new era of mobile and the web with Progressive Web Apps (PWAs). We like to think of PWAs as the best of native mobile apps and the web combined.

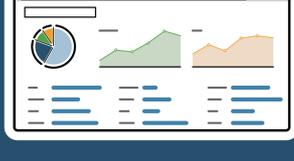

Integrates native functionality (camera, geolocation, etc.)

Installable to home screen

Searchable, which drives higher SEO ranking

Drives increased adoption and engagement

Works in low to no connectivity

"PWAs are an emerging technology, but they are the future of desktop and mobile web experiences."

- Jason Wong, Gartner

Powered by Lumavate

Marketers at some of the biggest brands in the world use our platform to build and publish apps. Check out a few of the brands we're proud to call our customers.

*"The biggest thing for us with Lumavate is **scalability**. There's a ton of value in knowing that in the future, there are ways that we can add technologies, features, and functionality that will further **empower and enable our end users.**"*

- Michelle Miller, Marketing Manager, Warren Rupp

Dream it. Build It. Launch It.

No Code Required
